STATEMENT

7+ years across consultancy and in-house, leading large-scale redesigns, launching new propositions, and guiding global cross-functional teams across more industries than I can count. It taught me to learn fast, adapt to anything, and figure out what a team actually needs from me. I use AI where it genuinely makes the work better, I set a high bar, and I invest in the people around me just as much as the product.

VOLUNTEERING

UX Designer for Social Enterprise

Part of multidisciplinary team that defined new brand strategy, co-created new look and feel, defined archetypes and re-imagined the site map for public website and client portal.

AI Champion for PwC & Elixirr

Worked to identify and evaluate emerging AI tools for potential team adoption to optimise workflow and enhance the quality of work.

Experience Design Academy for PwC

Led creation of Experience Design (XD) curriculum, delivering thought leadership that debunked XD deliverables.

WORK EXPERIENCE

Senior Product Designer at Elixirr Digital ————— **Dec 2025 – present**

British Cycling & Lloyds Bank • B2C • App

Lead 0 to 1 creation of habit-forming cycling app grounded in sports psychology, from product strategy through to UI. Built the front end using Cursor AI. Delivered a second version for a children's nonprofit on the same architecture. Two products, two audiences, one foundation.

British Cycling • B2C, B2B • Responsive Website

Reimagined British Cycling's entire clubs and events experience across the public site, user admin and internal tools, with overlapping permissions, personalisation and interconnected journeys throughout. Leveraged AI-assisted generation to deliver at pace.

Senior Product Designer at Boots (contract) ————— **Mar 2025 – Dec 2025**

Redesigned the touchpoints millions of Boots customers use most: checkout (21M transactions/year) and transactional emails (100M+ sent annually), and defined the strategy and full journey for a new same-day Click & Collect proposition from scratch.

Senior User Experience Designer at PwC ————— **Jun 2023 – Mar 2025**

Boots • B2C • Responsive Website, App

Augmented the in-house design team, leading design across multiple areas (Dropship, Marketplace, ‘Last Mile’) to rethink core components of the user journey and deliver omnichannel experiences at national scale. The work led to Boots offering a direct role.

Developer Portal, Full Fibre Wholesaler Client • B2B SaaS • Desktop

Took a developer portal from nothing to a fully defined product, working directly with C-suite in a highly technical full-fibre wholesale landscape. Defined the strategy, requirements and content architecture that connected the marketing site and portal into one experience.

Data Model Platform, Global Deals Client • Enterprise, B2B SaaS • Responsive Website

Led research, design and a team of designers in highly nuanced product: a global data platform used by thousands to model multi-million-pound financial deals, each with regional complexity across markets. Represented design at the highest level, presenting in global strategy meetings alongside senior partners across the US and New Zealand.

Information Architecture & Service Blueprints, Global Engineering Client • B2C, B2B

Audited 25+ sites, mapped customer and employee journeys, and built six service blueprints. Used the findings to create a universal site architecture that brought six sectors under one digital approach.

User Experience Designer at PwC ————— **Jun 2021 – Jun 2023**

Wealth Management Platform, Asset Management Client • B2C • Responsive Website

Led UX across two agile squads for a first-of-its-kind product: a digital experience for high-net-worth individuals to track their assets and access tailored financial guidance. When delivery stalled, reshaped the programme strategy to get it moving again. Coached junior designers and copywriters throughout.

Client Management Portal, Private Banking Client • Enterprise • Desktop

Completed a heuristic review and led the UX on a conceptual redesign of the client management portal, resulting in reduced administrative time for agents post-client calls. This success led to additional design service engagements with the client.

Delivery Platform, Global Deals Client • Enterprise, B2B SaaS • Responsive Website

Delivered UX at pace across 11+ features on a £1M-turnover platform, replacing an entire PowerPoint-based reporting workflow with a live digital experience for global client collaboration. Ran five research projects alongside heavy production without dropping quality.

Experience Consultant at PwC ————— **Sep 2019 – Jun 2021**

Where it started. Delivered UX for a major insurer; co-led change strategy for a national airline's CRM transformation; project-managed PwC's new consulting offering; and built an upskilling toolkit used by 1,000+ employees.
